PROFILE

Computer Science graduate with hands-on experience building software applications using Python, machine learning, and modern web frameworks. Developed AI powered applications, RESTful systems, and interactive web interfaces. Experienced in full stack JavaScript development including React and Node.js, along with AI pipeline deployment covering Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI agents, and AI automation workflows.

EDUCATION

BSc (Hons) Computer Science

University of Hertfordshire

Cumulative GPA: 3.9/4.5

Jan, 2023 - May 2026

WORK EXPERIENCE

DevelopersHub Corporation

May 2026 – June 2026

AI/ML Engineering Intern

- Developed AI-powered applications using LLMs and Retrieval-Augmented Generation (RAG) techniques.
- Built end-to-end solutions for document question answering and support ticket classification.
- Integrated AI APIs, vector databases, and semantic search into production-ready applications.
- Developed interactive Streamlit applications for real-time AI experiences.
- Applied prompt engineering techniques to improve LLM response quality and accuracy.
- Participated in model evaluation, testing, and performance optimization.
- Used Git and GitHub for version control and collaborative development.

Explorer Bees

NASTP, Rawalpindi

AI/ML Developer

Jul 2025 – Dec 2025

- Developed Python-based software solutions for computer vision applications.
- Collaborated with developers to build production-ready AI applications.
- Integrated multiple software components into complete end-to-end systems.
- Worked with Git for source control and collaborative development.
- Built reusable modules following clean coding practices.
- Participated in debugging, testing, and performance optimization.
- Developed user-facing analytics dashboards and reporting features.

Kairiz CyberTechnologies

Jul 2024 – Aug 2024

Artificial Intelligence Intern

- Developed Python scripts for data preprocessing and automation.
- Cleaned and transformed datasets using Python.
- Built visual reports using Matplotlib.
- Worked collaboratively within an AI development team.

PROJECTS

Facial Recognition Based Attendance System - Final Year Project

- Developed a real-time web-based attendance system using YOLOv8, InsightFace, and facial recognition for automated attendance management.

General Health Query Chatbot - LLM Application

- Developed an AI-powered health chatbot using Llama 3.1, Groq API, and Streamlit with prompt engineering and safety guardrails.

Football Analytics - Computer Vision

- Developed a football analytics platform using YOLOv11, OpenCV, and DeepSORT to generate player tracking and performance insights.

AI Research Assistant - RAG Project

- Built a RAG-based PDF question-answering system using semantic search, vector embeddings, and LLM-powered responses.

Personal Portfolio Website (In Progress)

- Building a responsive portfolio website using React, HTML, CSS, and JavaScript to showcase projects and technical skills.

Kotal Restaurant Website

Website: www.kotal.pk

- Developed and deployed a responsive restaurant website featuring menus, services, and an optimized user experience.

Luminous Stone Tops Website

Website: www.luminoustops.com

- Developed a responsive corporate website showcasing custom stone fabrication services, projects, and business information.

AI Email Assistant Agent

- Engineered a privacy-focused automation system using n8n workflows and locally hosted Llama models via Ollama to automatically classify, summarize, and draft intelligent responses for incoming corporate emails.

TECHNICAL SKILL

- Core Programming: Python, JavaScript, HTML5, CSS3, SQL
- AI & Machine Learning: LLMs, RAG, Prompt Engineering, Computer Vision, PyTorch, Scikit-learn
- AI Automation & Tooling: n8n, LangChain, Ollama, AI Agents, Workflow Automation
- Vision Models & Libraries: YOLOv11, YOLOv8, OpenCV, Roboflow, DeepSORT
- Web Frameworks & APIs: React, Node.js, Express.js, Flask, Streamlit, RESTful APIs
- Data Science & Analytics: Pandas, NumPy, Data Preprocessing, Matplotlib
- Databases & Infrastructure: SQL, SQLite, MongoDB
- DevTools & Version Control: Git, GitHub, VS Code, Google Colab, Jupyter Notebook

CERTIFICATION

- The Complete Full-Stack Web Development Bootcamp - Udemy
- Data Analytics, Data Science, ML, DL & NLP - Udemy
